

NEW SIX CYLINDER ENGINE

11th Nov'09: Mahindra & Mahindra Ltd., FES has developed Six Cylinder 5.9 Litre TCI (Turbo Charge Intercooler) Engine for Genset Applications.

Mahindra Powerol, one of the leading Powergen Companies is selling Genset in the market up to range from 5 to 320kVA.

With the launch of Six cylinder engines the indigenous range will increase up to 125kVA from 62.5kVA and Powerol will have a strong position to cater to the retail sector.

The launch of this high power range of gensets is aimed at significantly expanding Powerol's customer base to include captive power units, hospitality industry, IT parks, commercial complexes, retail outlets and the infrastructure sector.

The six cylinder TCI engine is validated for 154 hp at 1500 rpm for genset application and 175 hp at 2100 rpm for Industrial applications such as Pump, Backhoe Loader, Excavators, Dozer and Marine gensets.

The Engine also has the potential to go for 175 HP tractors for export market segment in future.
